

JETPILOT

WINTER

WINTER **2024**

**Close off Friday
18 August 2023**

DESIGNED IN
AUSTRALIA

SINCE 1986

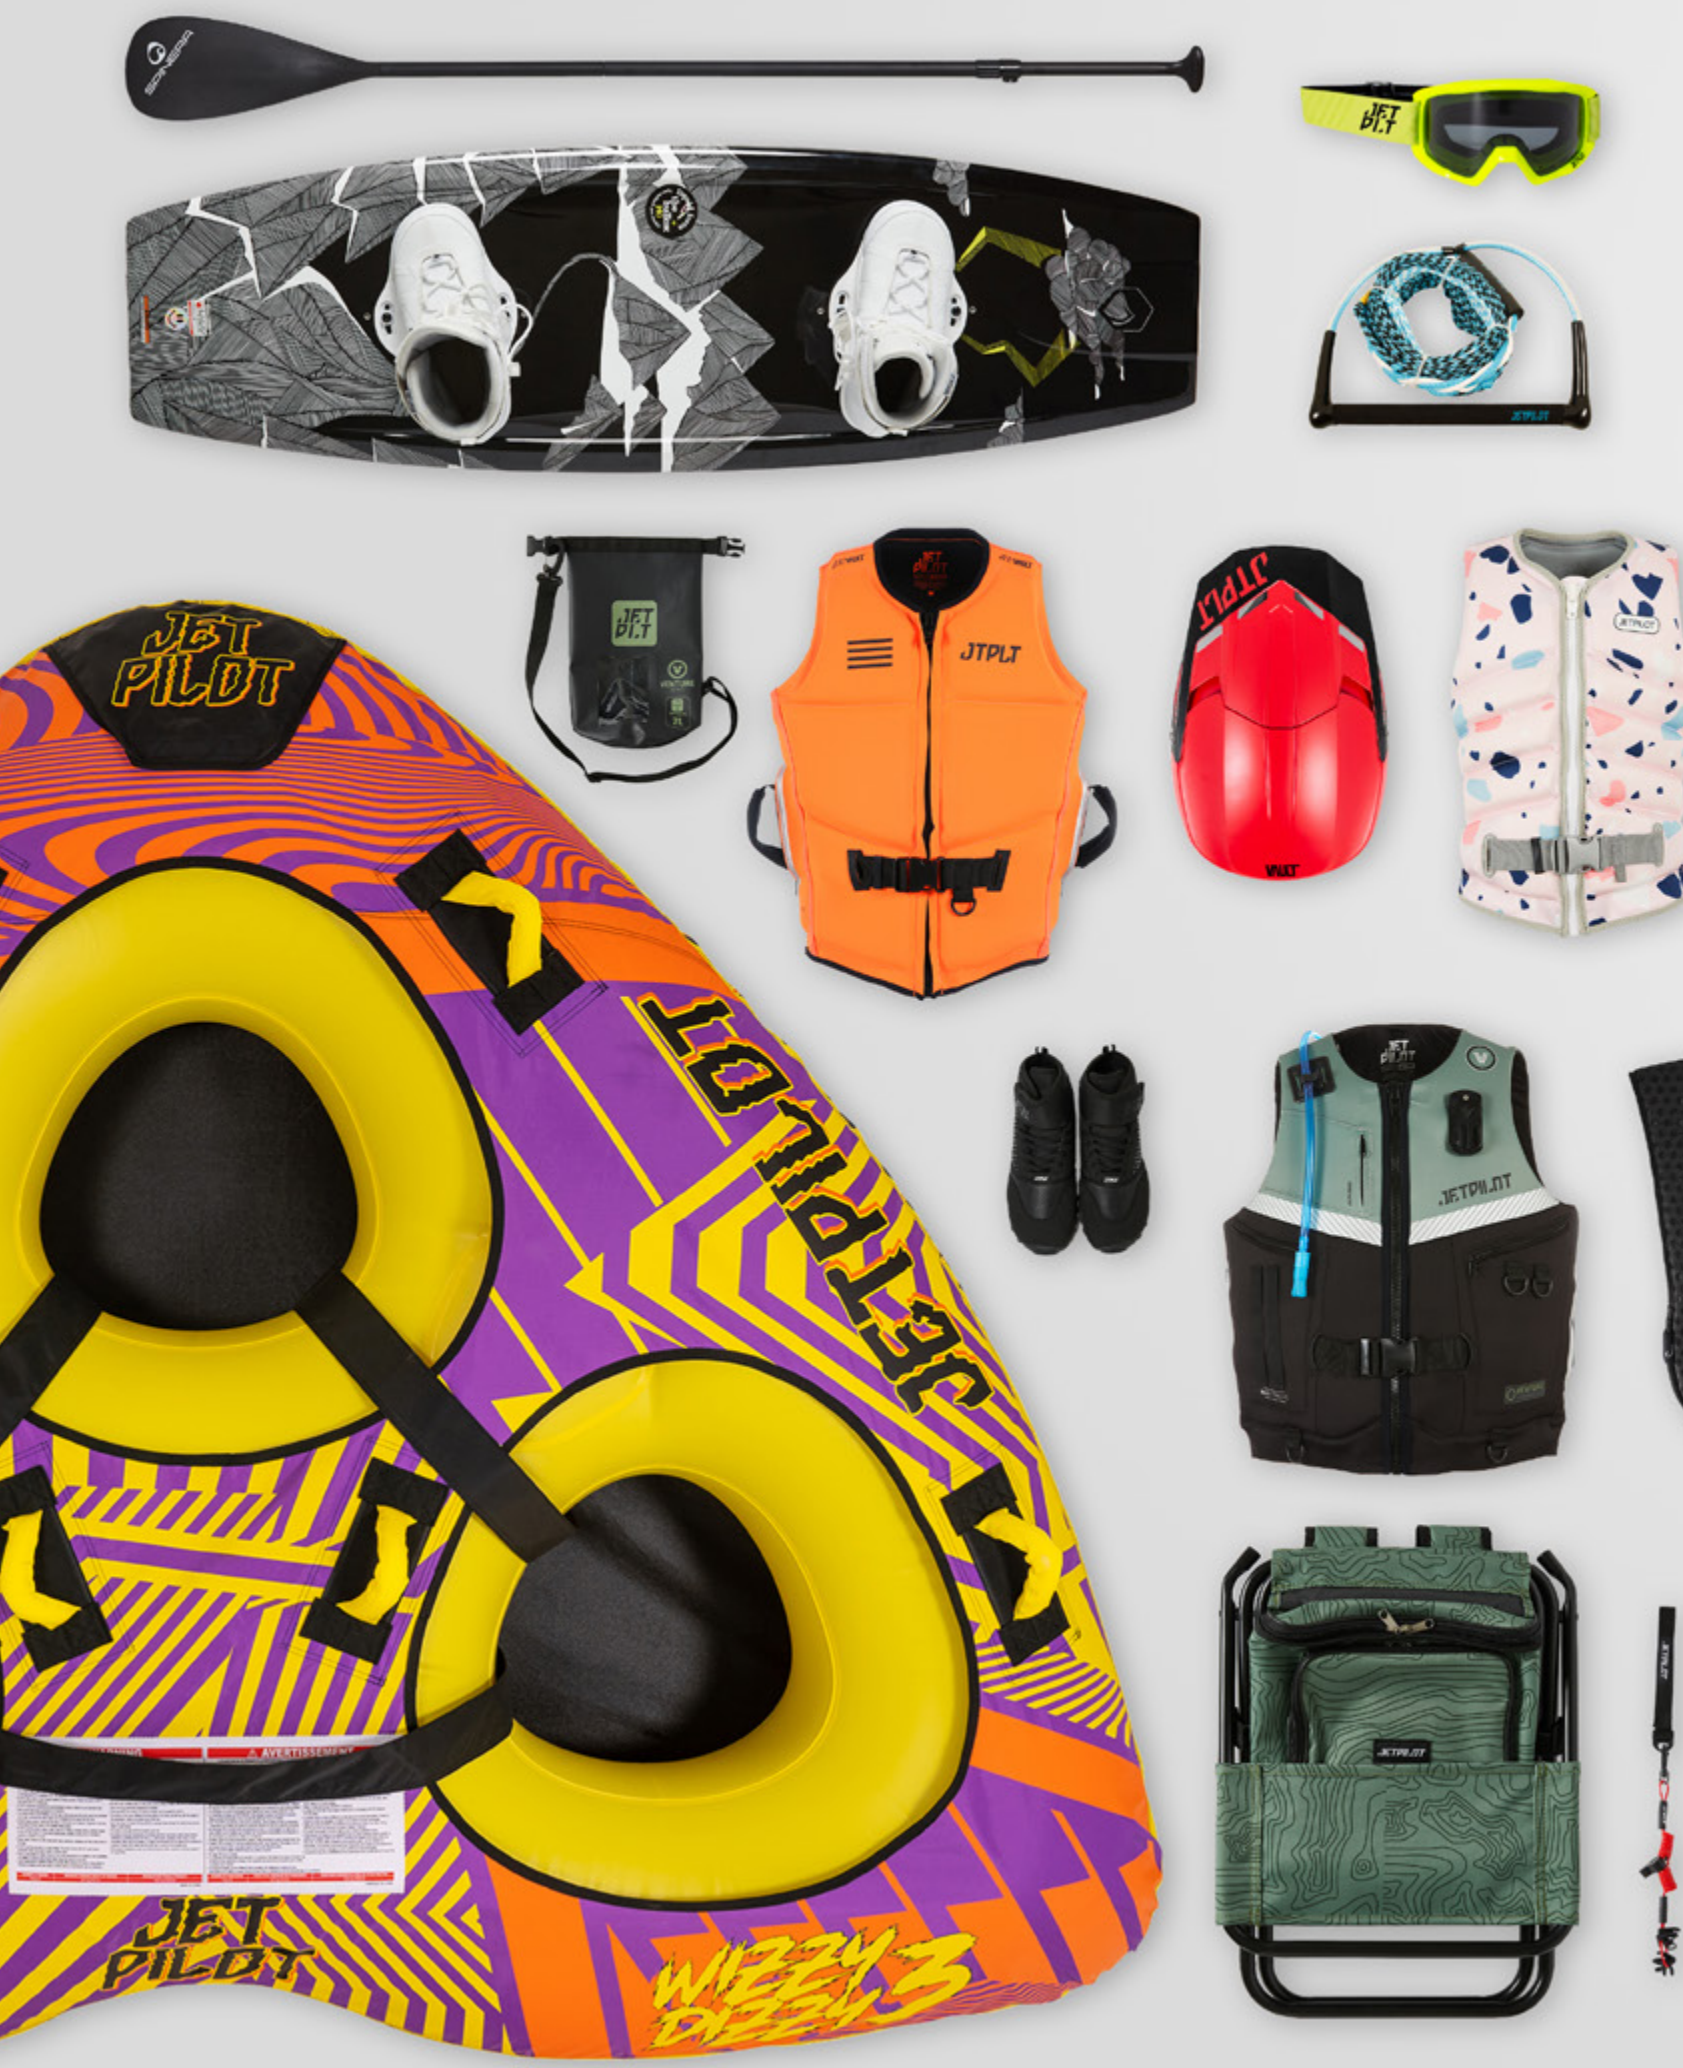

For 37 years we have been providing top quality water safety equipment to ensure that everyone can enjoy their time safely on the water.

Our #1 focus, from Day 1, has been safety. Whether it is a life vest to keep you safe whilst wakeboarding, venturing on a PWC, or a wetsuit to protect from the cold weather conditions or UV50+ protection with a hydro tee, we innovate to make life much more fun by providing premium quality water safety equipment for you and your crew that is comfortable, long lasting and keeps you looking good.

With high quality products designed to last, we emphasise long product lifecycle over fast fashion. We use a non-petroleum alternative to neoprene in our wetties, johns and tour coats and are constantly looking for more sustainable options throughout our product range and supply chain.

The only thing better than heading out on the water, with perfect weather is coming home safe at the end of the day.

THE JETPILOT FAMILY

At Jetpilot, our goals are not just to sponsor the “World Champion.” We want to support athletes that embody what it is to be a part of the Jetpilot family, we want those riders who absolutely froth the sport and water-loving lifestyle! Whether it be wakeboarding behind a boat or at a cable park, or even winching in the streets, or PWC racing, or even just being a professional outdoors adventurer, we love passionate people and we want to see them succeed. Don’t get us wrong, there is no-one more stoked than us when we see our athletes claim that #1 spot.

WE ARE INNOVATORS

We are driven by the desire to be the best in class and create products that let you chase the good times in the sun and out on the water.

Jetpilot proudly offers a wide range of industry first and premium product features that meet or exceed the most stringent Australian, British (ISO) and CGA (Coastguard) standards. The technologies and innovations highlighted on these pages, are just some of the core elements within the range that allows Jetpilot to offer you the best and safest products on the market.

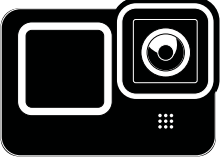

FEATURING INDUSTRY FIRST HIDDEN SUPERGRIP PATENTED

Some of the best innovations are the most obvious, in hindsight. Our patented Hidden Supergrip handles, turn our jackets into all around all-stars.

BUILT IN/REMOVABLE PRO-TECH IMPACT PROTECTION SYSTEM EN 1621-2 2014 LEVEL 1 APPROVED

Back protection is mandatory in PWC racing, that's why we invented our patent pending Pro-Tech removable impact protection system.

POV CAMERA MOUNT

Our patented POV camera mounts let you get up close and personal, without missing any of the action.

JET-LOCK SEAM

HYDRO SEAL ZIPPERS

WATER RESISTANT

BREATHABLE

UV PROTECTION

Our garments provide the absolute best UV protection.

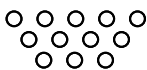

POLARISED LENSES

All of our glasses and goggles are equipped with polarised lenses.

FLOAT TECH

All of our glasses and goggles have built-in floatation technology.

AIR FLOW

Our race-engineered air-flow system helps to keep riders cool.

DRY SAFE

Our dry safe range will keep all of your gear protected around the water.

SMART TOUCH

Our gloves are equipped with smartphone friendly fingertips.

JET-LOK STITCH

Our Jet-Lok Flat Seam Stitch offers comfort and durability, improving the lifecycle of our wetsuits.

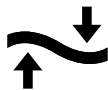

FSC

All of our swing tags are made from FSC responsible sources.

360 STRETCH

When performance is key, our 360 stretch material is king.

FLEX-LITE ULTRA

Our Flex-Lite Ultra fabric is designed to last, built tough without sacrificing comfort or durability.

ECOPRENE

Made from recycled plastic bottles, our Ecoprene fabric offers a sustainable, neoprene alternative.

INSANELY LIGHTWEIGHT, DURABLE AND SOFT OUTER SHELL MADE FROM **RECYCLED** PLASTIC BOTTLES

INTRODUCING

ECO · PRENE

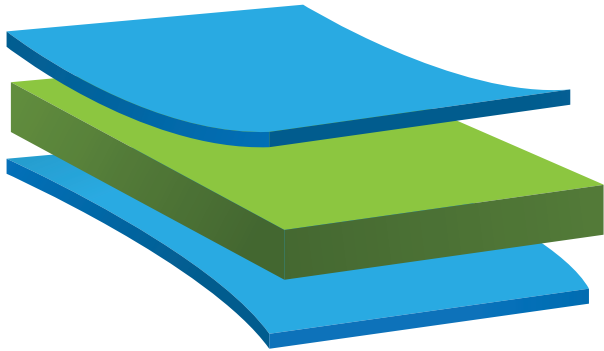

FROM WATER BOTTLES
TO LIFE JACKETS

 **JETPILOT LIFE CYCLE INITIATIVE**
Find out more about the Jetpilot Life cycle

30% LIGHTER THAN TRADITIONAL NEOPRENE

TRIPLE LAYER CONSTRUCTION

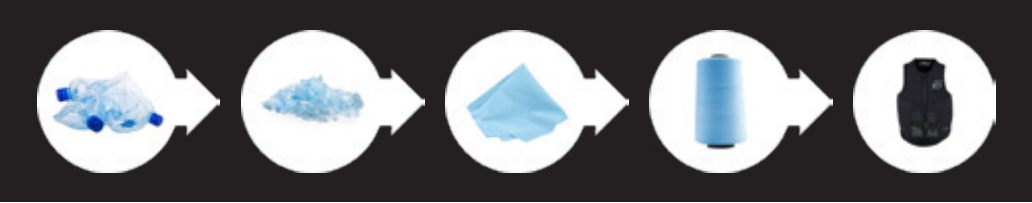

Ecoprene is a 3 layer fabric, designed to have the smallest environmental impact as possible.

- OUTER LAYER**
Recycled polyester jersey
- MIDDLE LAYER**
Recycled 3D foam
- INNER LAYER**
Recycled polyester jersey

THE PROCESS

Recyclable plastic bottles are turned into pellets, which are spun into yarn and used to create our recycled ecoprene.

Sustainability certified

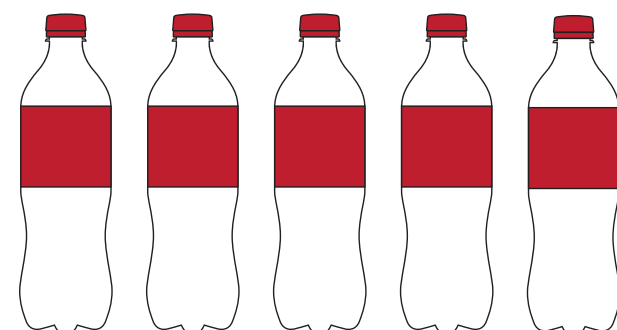

SUSTAINABILITY

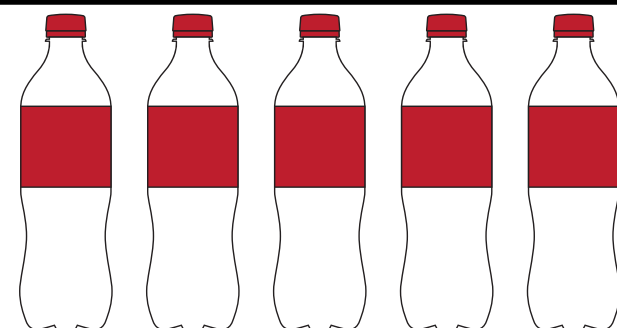

Our Ecoprene vests, on average, save 10 plastic bottles from entering the ocean.

Here at Jetpilot, we are committed to transitioning more and more products to be eco-friendly and use Ecoprene. By next summer, we are aiming to have at least 70% of our range using Ecoprene.

10 BOTTLES USED IN 1 ECOPRENE VEST

SUSTAINABILITY

— WINTER WAKE —

LIMESTONE NEOPRENE

A NON-PETROLEUM BASED ALTERNATIVE

WARMER ♦ LIGHTER ♦ MORE FLEXIBLE ♦ MORE DURABLE

A neoprene developed from Limestone (calcium carbonate) rather than petroleum based that has set the standard in neoprene. Used in all Jetpilot neoprene products (long johns, tour coats and wetsuits).

Warmer – Due to nitrogen cells captured in neoprene during Limestone processing treatment providing better thermal insulation and heat retention.

Lighter – Micro bubble structure created during processing helps to ensure water doesn't penetrate or weigh down the neoprene.

More Flexible – Not only is the makeup of Limestone Neoprene more stretchy, it retains its form over time, meaning it won't stretch out from the original fit, season after season.

More Durable – Less prone to tears due to cell construction in neoprene creation.

**SELF SERVICE
5 YEARS**

SAFETY IS THE #1 PRIORITY

- An inflatable is only as good as your mechanism. We use Halkey as they are the biggest in the world and have no failure rates.
- Polyester ensures comfort with contoured, slim fit design.
- Longer jacket designs help ensure the user is less likely to experience added torso injury when recovered from the water in an emergency.
- Our jackets can be **self-serviced for 5 years** from consumer purchase dates with no fly away clips for convenience.
- Our jackets are to a higher quality AS4758.1 2015 standard.
- 33 gram bottles to be used.
- Advanced multi-fit design.

JA23154

RAIN, WIND, HAIL OR SHINE

Okay, well maybe not hail, but we all know that our great outdoors can be a bit temperamental. After all the planning and packing, finally getting outdoors and then the weather takes a turn for the worst - we have all been there.

In these situations we have 2 options. Go home, or, gear up and still get to enjoy our weekend.

We know what option we would choose.

VENTURE PANTS
JA23153

PROTECT YOURSELF, YOUR WAY

Depending on the conditions, you can add or remove gear as you see fit, with our Venture Series Collection.

Cold morning? Start with the Venture John and Venture Jacket, then once it heats up you can remove the jacket without overheating. Or if it is a nice hot Summer's day, maybe just the Venture Pants and matching Life Vest is all you need.

UV 50+ PROTECTION

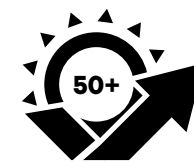

The Australian sun can be a scorcher. We have all been burnt at some point in our lives, but new research shows that the risk of developing melanoma doubles if we have had more than 5 sunburns throughout our life. We want everyone to enjoy the outdoors, but stay safe whilst doing it. With our range of UV 50+ protection gear, you can rest easy without having to slather on the aloe after.

We have worked with Surf Life Saving for a number of years now. Being trusted to keep the men and women safe that keep all beach goers safe, is a testament to the quality of products that we create for water safety and UV protection.

WHAT **ANCHOR** IS RIGHT FOR YOU?

PWCs offer more freedom and manoeuvrability than traditional, full-sized boats. Though this means that you're not always guaranteed an easy way to anchor your PWC or have the option to beach it.

Beaching your PWC can also harm the hull of the ski over time, potentially cause injury with sudden jarring movement and if in a tidal area, requires monitoring to account for water levels.

So depending where you're heading, it's important to have the correct equipment and knowledge for when you take a break on land and are looking to safely drop anchor.

SAND ANCHORS

A popular option as they're functional and convenient as they don't take up space and are easy to set up. Simply fill with sand or rocks and then remove the contents once you're ready to set off again. Great for shallow or shore anchoring though are also good for deeper water too. However, this type of anchor doesn't work well in rough areas like crashing waves or in busy areas that create a lot of wash.

FLUKE ANCHORS

An effective option where staying power is required, especially in muddy, sandy or other soft bottoms. It is ideal for when you're using in the middle of the water including larger swells and great for when you're anchoring up for a longer period of time, for example, when fishing. Choose the lightweight option for calmer, sandy beach use or grab the 2.5kg chain fluke anchor for improved where deeper water or rougher water use is required.

PLOUGH ANCHORS

The all-rounder anchor that is perfect for sandy or muddy bottoms as they are designed to dig in and 'bite' by filling up to help hold them in place. The 2 metre chain helps to ensure the anchor remains wedged rather than floating up. Adjust rope length by using the carabiner to lock off at the looped knot depending on water depth.

FOLDING ANCHOR SYSTEMS

A compact option for convenience with less of the sharp edges that could damage your PWC. This type of anchor is a blend of the benefits of an anchor designed for reef or rocky areas but works just as well in soft bottom areas. This is a great option for calm water use and with more lightweight PWCs or kayaks, etc.

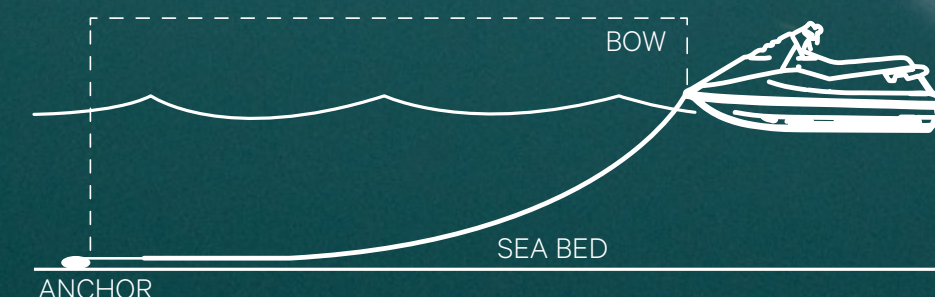

HOW MUCH ROPE TO USE?

A common misconception is if your anchor has hit the bottom, you're all good to tie it off. However, the deeper you are, the more rope you'll actually need. An easy reference to remember is the 5:1 ratio. This means if you're in 5 feet of water, you'd want to have 25 feet of rope. Tie the rope to the front hook (bow hook) as shown above. This will help ensure the anchor lays correctly in the water. If you're in rougher conditions, or strong winds, you might want to give yourself a bit more slack (i.e. up the ratio to 8:1) and you'll be fine.

SCOPE 5:1

For every 1m of water = 5m of length cast out

JTPLT ≡

THE **NUMBER 1** RACE GEAR IN THE WORLD

HERE'S TO THE CUP

PATTAYA CITY, THAILAND

The Jetski World Cup is the biggest event of the year. With the biggest prize purse of the year, the entire global Jetski racing community showed up in full force.

Held over 4 days, we saw multiple world champions crowned and some unfortunate heartbreak moments.

Our Jetpilot team riders shone bright throughout the entire event. There are too many fantastic results to list, but safe to say that we have a few World Champions as part of our team.

We are honored to be able to support these world class athletes and help them achieve their goals.

Between the highs and the lows, being fully immersed in the local culture, this was an event that we will never forget.

CONEHEAD TECHNOLOGY™

Conehead Technology™ allows us to build a lightweight helmet with a more comfortable feel, without compromising your safety.

IMPACT

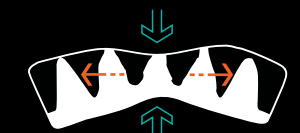

HEAD

0ms

Impact force directed towards head.
Head pushing in opposite direction.

IMPACT

HEAD

6ms

On impact the cones compress, directing the energy and force sideways withing the foam. As the base of the cones compress, they gradually slow down the head.

OUTCOME

Impact force directed towards head.
Head pushing in opposite direction.

PERFORATED AIRPRENE

Internal padding has been ergonomically designed to keep your head safe in advanced comfort. Our Perforated Airprene liner increases water release and draining, reducing drying time.

RACE-ENGINEERED
AIR-FLOW
